PROFILE

Web developer with a strong interest in making responsive web applications for socially conscious organisations. I am continuously learning new languages, frameworks and libraries that I can utilise in any projects.

TRAINING

Founders and Coders CIC
Full-Stack Javascript Course
October 2017 to present

An immersive, peer-led and project-based 16 weeks full stack javascript web developer bootcamp.

PROJECTS

BlindAid (Current project)

A web application to connect volunteers with opportunities within the company and lets them know what is happening/ how to get involved.

Project link- https://github.com/fac-12/BlindAid

HomeSafe MVP

A web application to allow guardian's to inform their young person's school if someone other than the regular adult will be picking the child up from school.

Project link- https://github.com/fac-12/homesafe
